

Guiding Your Horizon Europe Journey

Support Across All Stages of the
Proposal and Project Lifecycle

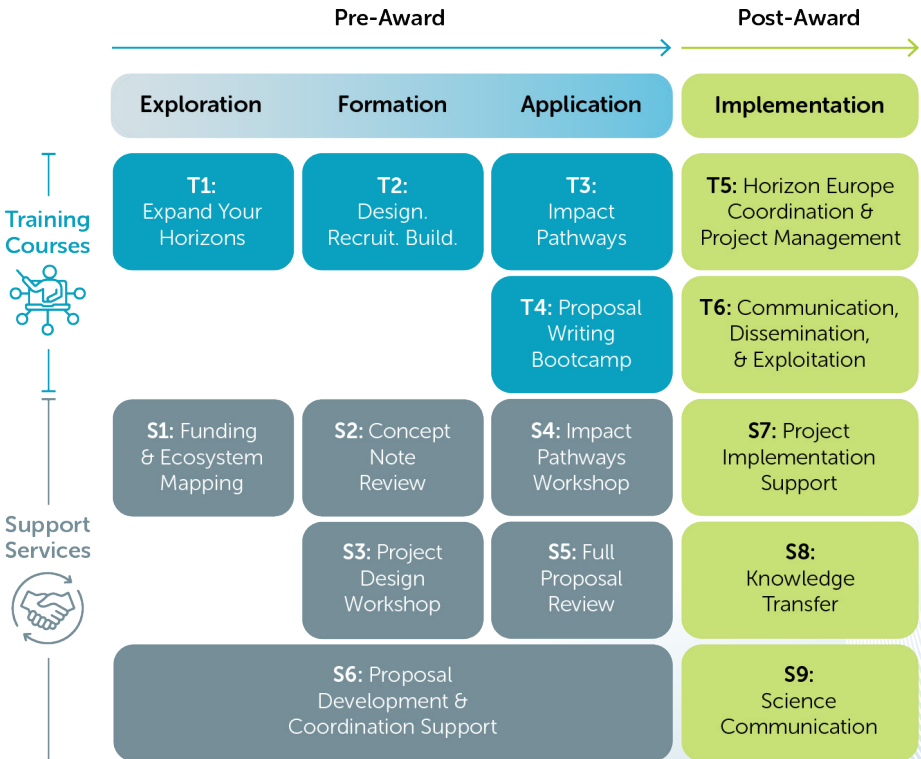

About Us

At ERINN Innovation, we specialise in guiding Horizon Europe projects to success. Our expert-led, comprehensive support covers the entire project lifecycle, from proposal development to post-award implementation.

We offer in-depth proposal reviews, tailored training, funding mapping, and hands-on assistance with both proposal writing and post-award project management. With decades of experience, our team is dedicated to helping your proposal reach its full potential.

We understand that every Horizon Europe research team is different. That's why we offer **flexible, customised support**, giving you the right tools and resources at each stage of the process.

Choose from our range of courses and services below:

Training Courses

Unlock the full potential of Horizon Europe with our expert-led training. Whether you're new to the programme or looking to refine your approach, our expert guidance will empower you to **maximise your funding opportunities**. Whatever your role, our training courses are designed to help you succeed in this competitive funding landscape.

Our Training Guarantees:

- Always delivered by two expert trainers
- Online or in-person options
- Interactive and engaging
- Tailored to meet your specific needs.

Our Horizon Europe Experience:

- Reviewed over **200 proposals**
- Trained over **1500 participants**
- Delivered over **35 courses**
- Participants include project coordinators, research assistants and managers, work package and task leaders, National Contact Points and doctoral candidates.

and let's start building
your path to success!

T1: Expand Your Horizons

Are you new to Horizon Europe or looking to select the most suitable call topics for your research?

“Expand Your Horizons” is the perfect course to start your Horizon Europe journey and unlock funding opportunities that best match you.

Course Objectives:

- Gain a clear understanding of Horizon Europe collaborative projects and their role in supporting your research.
- Effectively navigate Horizon Europe Work Programmes and the Funding & Tenders Portal.
- Build confidence in identifying the right funding opportunities.
- Understand the key processes, timelines, and requirements for successful Pillar II applications.

Join us to demystify Horizon Europe and start your journey toward successful funding today!

T2: Design. Recruit. Build.

Turning your idea into a successful Horizon Europe proposal requires precision and strategic planning from the very start.

“Design. Recruit. Build.” is the ideal course for researchers who have already selected a call topic and are beginning the process of designing their Horizon Europe project.

Course Objectives:

- Respond fully to the call topic using a detailed call topic analysis methodology.
- Select and recruit the right partners for a well-rounded and impactful consortium.
- Design a comprehensive and coherent project using ERINN Innovation’s concept note template.

Join us to build a strong foundation for your proposal and set your project up for success!

T3: Impact Pathways

Maximise the impact potential of your Horizon Europe proposal through ERINN Innovation's expert-driven and interactive course.

This workshop is designed to help coordinators and project partners integrate impactful strategies throughout your project, increase the impact potential of the research, and achieve top marks in the Impact Section of the Horizon Europe proposal.

Course Objectives:

- Develop credible, actionable Impact Pathways integrating these considerations into the project design.
- Incorporate the 'language' of impact throughout your proposal to enhance clarity and relevance.
- Identify appropriate target users and dissemination mechanisms for your results.

Join us to master the art of creating compelling Impact Pathways and ensure your proposal delivers lasting, transformative outcomes.

T4: Proposal Writing Bootcamp

Take your Horizon Europe proposal to the next level with our intensive "Proposal Writing Bootcamp."

This course dives deep into the structure of Pillar II proposals, provides a strategy for responding to the template, and advises you on how to craft your Part B for maximum impact and evaluation scores.

Course Objectives:

- Get examples for every subsection and master the content requirements — Excellence, Impact, and Implementation.
- Learn to communicate your proposal with clarity, conviction, and impact.
- Gain insight into the application process from the evaluator's perspective.
- Identify and avoid common pitfalls that can cost you vital marks in your proposal.

Our Proposal Writing Bootcamp is also available as an online, self-paced course for those writers looking for self-directed and immediate guidance. Individual & group rates available.

Access the course online!

T5: Horizon Europe Coordination & Project Management

This training is designed to support the coordination team at the post-award stage of their Horizon Europe journey.

Course Objectives:

- Navigate risk management.
- Contractual obligations.
- Financial reporting.
- Governance structures.
- The participant portal.

This course is ideal for coordinators, project managers, research managers, and administrative or financial support staff involved in the post-award phase of Horizon Europe projects.

Join us to gain the essential tools and insights for effective project coordination, from proposal writing to successful project management!

T6: Communication, Dissemination, & Exploitation

This training equips you with the tools and strategies needed to effectively communicate project results, ensuring lasting impact, and meeting Horizon Europe's requirements.

This course is ideal for project coordinators, research support staff and partners, especially those leading Communication, Dissemination, & Exploitation activities.

Course Objectives:

- Understand the key principles and requirements for Communication, Dissemination, & Exploitation in Horizon Europe.
- Learn to engage stakeholders, craft compelling messages, and implement tailored outreach strategies to maximise visibility.
- Develop skills to track and measure impact, using KPIs to evaluate the success of your communication efforts.

Join us to master the art of communication and ensure your project makes a measurable, impactful contribution!

Support Services

At ERINN Innovation, we provide **practical, hands-on support** at key stages of Horizon Europe proposal development, helping researchers and coordinators maximise their funding success. From identifying the right funding opportunities to refining project concepts and guiding you through the proposal development process, we offer a structured, strategic approach that ensures your project is set up for success.

Our tailored services include **workshops, expert mentoring, and strategic guidance** aimed at strengthening Impact Pathways, coordinating consortia, and enhancing the quality of your proposal. We're with you every step of the way, from proposal development and review to submission, and beyond. Once your project is funded, our continued support can ensure smooth administrative set-up, compliance, and efficient implementation.

S1: Funding & Ecosystem Mapping

Through workshops and mentoring, we guide researchers to assess and prioritise funding opportunities, identify key consortium partners, and develop strategies to maximise funding success.

S2: Concept Note Review

Developing a clear project concept note is a crucial first step in Horizon Europe proposal preparation. We provide a tailored concept note template, covering project structure, objectives, consortium composition, and Impact Pathways, which is thoroughly reviewed by our team, providing detailed written feedback and actionable recommendations.

This step happens early, allowing consortiums time to take on board the recommendations and develop an aligned and coherent proposal.

S3: Project Design Workshop

This interactive brainstorming workshop brings together a group of core researchers to develop a strong, targeted project design that aligns with their chosen call topic. Our team facilitates a structured process to refine ideas, ensuring they meet the scope and expected outcomes of the call topic and create a robust project design, forming the basis for building your proposal.

S4: Impact Pathways Workshop for Consortia

This interactive workshop is designed to place impact at the centre of your proposal development. Our team facilitates an interactive workshop with your consortium to brainstorm and develop robust Impact Pathways that align with the expected outcomes of your call topic, laying the foundation for the Impact Section.

S5: Full Proposal Review

Two members of our expert team provide an extensive review of your complete proposal draft, assessing it as an evaluator would, and ensuring alignment with the call topic and official requirements. The coordination team will receive detailed written feedback with specific recommendations and examples to improve clarity, structure, and coherence. A final feedback meeting ensures all questions and queries are answered.

S6: Proposal Development & Coordination Support

This comprehensive support assists coordinating teams through every stage of Horizon Europe proposal development, from concept design to submission. Our support includes project management, partner recruitment, role negotiation, delegation of responsibilities, text drafting, budget development and participant portal management. We offer tailored templates, facilitate consortium calls, and assist in gathering and refining inputs, providing strategic guidance and mentorship throughout the entire process.

S7: Project Implementation Support

Once your project is funded, we provide hands-on mentoring and support, establishing effective project management systems and ensuring a successful project launch. Our support can continue throughout the project lifecycle, guiding you and your team to meet reporting milestones, maintain compliance, and ensure smooth and consistent project delivery at every stage.

S8: Knowledge Transfer

ERINN Innovation delivers comprehensive services to help turn research outputs into meaningful, measurable outcomes. Our approach blends systematic methodologies, strategic insight, and hands-on support to ensure innovative knowledge is understood, transferred, adopted, and applied at scale. This can include impact consultations for ongoing projects; toolkits for monitoring and capturing impact throughout projects; legacy planning workshops for closing projects; training for embedding impactful practices within teams; and guidance for managing impact across portfolios.

S9: Science Communication

At every stage of your project, we deliver tailored communication services designed to ensure your work reaches the audiences that matter most, from policymakers and funders to industry personnel and the wider public. We combine strategic messaging with creativity and high-level design to create communication materials that reflect the value and credibility of your work. At the outset of the project, we design strong visual identities, from logos and brand guidelines to professional visual assets, to enhance your project's presence. As your project progresses, we transform complex reports and technical findings into accessible, engaging and impactful resources tailored to your audiences, including promotional leaflets, policy briefs, infographics, digital content, videos and strategic dissemination materials.

Partner in Projects

ERINN Innovation is an active consortium partner in EU-funded research and innovation projects. We typically lead the Communication, Dissemination, & Exploitation work package, drawing on deep expertise in communication, knowledge transfer, stakeholder engagement, and Living Lab methodologies.

Our mission is to ensure that your project's results are not only produced and published, but understood, shared, and transformed into meaningful societal impact. We work closely with consortium partners to maximise visibility and drive real-world uptake from the very beginning.

With 25 active EU projects and partnerships with hundreds of institutions across Europe, ERINN Innovation is ready to strengthen your consortium and amplify your project's outcomes.
